

Nextiva

IntelliView™

Video Analytics for Critical Infrastructure, Transit, Retail, and Campus Environments

Features and Capabilities	Nextiva Analytics Silver	Nextiva Analytics Gold	Nextiva Analytics Platinum
Complete integration with all Nextiva™ Enterprise solutions and capabilities	■	■	■
Edge device based for lower processing, infrastructure, transport, and server costs	■	■	■
Superior analytic accuracy in: <ul style="list-style-type: none"> • Virtually all weather environments and day/night applications • Scene change detection for full or partial view (including camera movement) 	■	■	■
Real-world understanding and accurate object detection within full view or specific areas of interest using ground or image plane analysis	■	■	■
User-defined alert criteria via definition of object types or rules	■	■	■
Object analysis: classification of objects by type (people, vehicles, unknown or anything)	■	■	■
Object filtering via definition of object minimum and maximum sizes and allowable percentage of change in size	■	■	■
Moving object speed analysis (double tripwire directional timer)			■
Area of interest analysis, including: <ul style="list-style-type: none"> • Moving objects that enter, exit, appear, or disappear • Moving objects that are loitering • Non-moving objects that are removed or left behind 	■	■	■
Virtual perimeter analysis to detect moving objects crossing: <ul style="list-style-type: none"> • A single virtual line in the field of view (single tripwire) • Multiple virtual lines noting specific orders and directions (double tripwire) 		■	■
Context-based viewing and analysis with multiple, view-specific rules for PTZ camera pre-sets (Automatic View Recognition)		■	■
Multiple rule combinations for single views for greater flexibility in policy creation and complex event alerting	■	■	■
Nextiva Forensic Analyzer to rapidly build rules for analysis of past events in the stored video	■	■	■

Which Nextiva Analytics Package is For You?

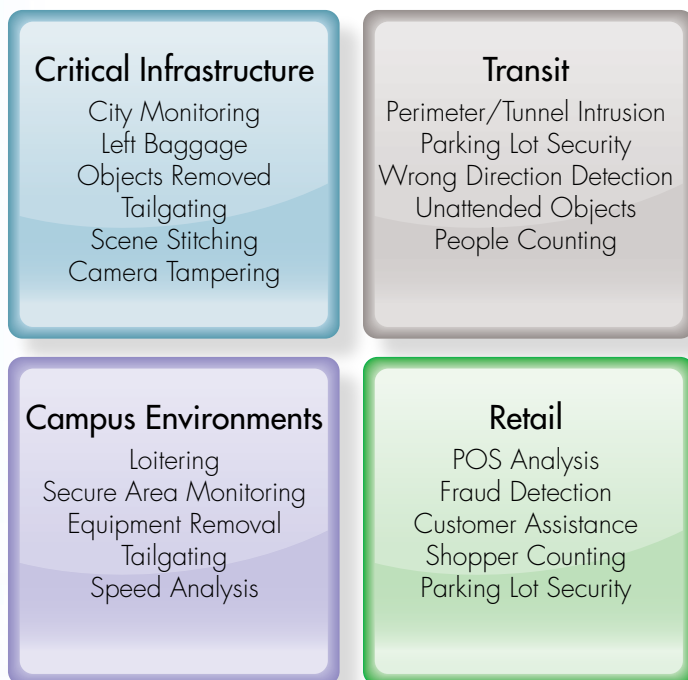

Nextiva Analytics Silver is designed for organizations that seek sophisticated analytic capabilities, including the ability to detect people, vehicles or unknown objects in specific areas, without the need for complex rules and events.

Nextiva Analytics Gold is designed for organizations that require all of the capabilities of Nextiva Analytics Silver, plus the ability to detect perimeter breaches through the use of virtual directional tripwires. It also includes detection of objects that appear, are removed from, or are left behind in specific areas of interest.

Nextiva Analytics Platinum is a comprehensive, all-inclusive analytics package for highly security-sensitive organizations that require monitoring of all objects in and around a critical location, including events preceding and following a perimeter breach and loitering objects.

Industry-Focused Video Applications

Nextiva Analytics applications are designed to address specific industry challenges, goals, and operational environments. Available applications include:

Full integration with the Nextiva video management portfolio effectively eliminates the operational issues associated with standalone analytic products. And Nextiva analytics-embedded edge devices make analytics practical and cost-effective for virtually every camera. Plus, Nextiva Video Analytics are from Verint®, the leader in networked video solutions worldwide.

Verint. Powering Actionable Intelligence.®

Verint Systems Inc. is a leading global provider of analytic software-based solutions for security and business intelligence. Verint solutions help organizations make sense of the vast voice, video, and data available to them, transforming this information into *actionable intelligence* for better decisions and highly effective performance.

Since 1994, Verint has been committed to developing innovative solutions that help global organizations achieve their most important objectives. Today, organizations in over 50 countries use Verint solutions to enhance security, boost operational efficiency, and fuel profitability.
